DETAILED ACTION

Claim Objections

1. **Claims 1-3** are objected to because of the following informalities:

Claim 1:

Lines 1-2, "in which received words" should be "in which blocks of received words".

Line 8, "every said kind" should be changed to "every of said plurality of kinds".

Line 9, "said decode processing" should be changed to "said predetermined decode processing".

Line 12, "block" should be "blocks".

Claim 2:

Line 3, "said block" should be changed to "said residual blocks".

Line 4, "said block" should be "said blocks of said received words".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to

Application/Control Number: 09/942,671 Page 3

Art Unit: 2634

which it pertains, or with which it is most nearly connected, to make and/or use the invention. The recitation "setting a plurality of kinds of block that is a processing unit in said decode processing" on lines 5-6 of claim 1 is found to be unable.

- 4. Claims 4-6 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The recitation "setting a plurality of kinds of block that is a processing unit in said decode processing" on lines 20-21 of claim 4 is found to be unable.
- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. **Claims 1-3** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 7. Claim 1 recites the limitation "said block" in line 18. There is insufficient antecedent basis for this limitation in the claim (it is not clear what block the claim is referring to (i.e. "said block of said received words")).

Allowable Subject Matter

8. Claims 1, 4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st and 2nd paragraph, set forth in this Office action.

Application/Control Number: 09/942,671 Page 4

Art Unit: 2634

9. Claims 2-3, 5-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1st and 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nakamura et al. (US 6,757,865) disclose Turbo-Code Error Correcting Decoder, Turbo-Code Error Correction Decoding Method, Turbo-Code Decoding Apparatus, And Turbo-Code Decoding System.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dac V. Ha whose telephone number is 571-273-3040. The examiner can normally be reached on 5/4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on 571-272-3056. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
